### EDUCATION

|                                                       |                    |
|-------------------------------------------------------|--------------------|
| <b>Er. Perumal Manimekalai College of Engineering</b> | Hosur, TN          |
| Bachelor of Computer Science; CGPA: 7.80 / 10         | <b>2022 – 2026</b> |
| <b>Sri Vijay Vidyalaya Matric.Hr.Sec.School</b>       | Hosur, TN          |
| Class XII – Computer Science; Perc. : 75.83%          | <b>2021 – 2022</b> |
| <b>Sri Vijay Vidyalaya Matric.Hr.Sec.School</b>       | Hosur, TN          |
| Class X; Perc. : 86 %                                 | <b>2019 – 2020</b> |

### SKILLS SUMMARY

- **Languages:** Python, Bash, SQL
- **Cloud Platform:** AWS (EC2, IAM, VPC, EKS, ELB, S3)
- **Containerization & Orchestration:** Docker, Kubernetes
- **CI/CD Tools:** GitHub Actions, Jenkins
- **Version Control:** Git, GitHub
- **Operating System:** Linux (RedHat)
- **Infrastructure as Code:** Terraform, AWS CloudFormation
- **Monitoring & Logging:** Prometheus, Grafana

### INTERNSHIP EXPERIENCE

#### AWS Cloud Architecting | AWS Academy

July 2025 – Aug 2025

*A globally recognized cloud computing program by Amazon Web Services covering core architecting principles and AWS services*

- Completed **60 hours** of structured cloud training covering **AWS core services**, cloud architecture design, security best practices, and cost optimization strategies
- Obtained hands-on knowledge in designing **scalable, highly available, and fault-tolerant systems** on AWS infrastructure using services like **EC2, VPC, S3, IAM, and Load Balancers**

#### Cloud Computing | Besant Technologies

Dec 2025 – Apr 2026

*A technology training and staffing company specializing in cloud computing, DevOps, and software development*

- Gained hands-on experience with **AWS core services**, including cloud infrastructure setup, deployment, and management
- Containerized and deployed applications using **Docker** and **Kubernetes**, reducing deployment time and improving application portability
- Developed proficiency in **Linux administration** for server management, shell scripting, and cloud environment configuration

### PROJECTS

#### Autoscaling Web Application on AWS EKS | Terraform • Kubernetes • Docker • GitHub Actions | [GitHub](#)

*A cloud-native DevOps project focused on scalable infrastructure automation*

- Provisioned highly available AWS infrastructure (VPC, EKS, EC2, ALB) using **Terraform IaC** and deployed a **containerized** web application across a multi-node Kubernetes cluster in 2 availability zones
- Configured **Horizontal Pod Autoscaler (HPA)** to dynamically scale pods from 2 to 10 based on CPU/memory utilization, with remote state management using **AWS S3 and DynamoDB**
- Automated **CI/CD pipeline** using GitHub Actions to build, push Docker images to AWS ECR, and deploy to EKS with zero-downtime rolling updates on every commit

#### AWS EKS CI/CD Platform | Terraform • Kubernetes • Docker • GitHub Actions • Grafana • Prometheus | [GitHub](#)

*Automated container deployment platform on AWS EKS with CI/CD, autoscaling, and monitoring.*

- Provisioned **production-grade AWS infrastructure** (VPC, EKS cluster, ECR) using **Terraform IaC** and deployed a **containerized** Node.js application on **Kubernetes** with **zero-downtime rolling updates** across 2 **availability zones**
- Built a **GitHub Actions CI/CD pipeline** to automate **Docker image builds**, **ECR pushes**, and **Kubernetes deployments** on every commit, with **automatic rollback** on failure eliminating manual intervention
- Implemented **Horizontal Pod Autoscaler (HPA)** to dynamically scale pods (**2–6 replicas**) based on **CPU utilization** and deployed **Prometheus** and **Grafana** via **Helm** for **real-time cluster observability** and monitoring

### CERTIFICATION

#### AWS Academy Graduate - AWS Academy Cloud Architecting | [Certificate](#)

- Completed 60 hours of AWS Academy Cloud Architecting training, gaining hands-on experience in AWS core services, cloud architecture design, security best practices, scalability, high availability, and cost optimization using services such as EC2, VPC, S3, IAM, and Load Balancers.
